The Corpus of Contemporary American English (COCA) is the only **large**, genre-balanced corpus of American English. COCA is probably the **most widely-used corpus of English**, and it is related to many other **corpora of English** that we have created, which offer unparalleled insight into **variation in English**.

The corpus contains more than **600 million words** of text (20 million words each year 1990-**2019**) and it is equally divided among spoken, fiction, popular magazines, newspapers, and academic texts.

Click on any of the links in the search form to the left for context-sensitive help, and to see the range of queries that the corpus offers. You might pay special attention to the **comparisons between genres and years** and the (new) **virtual corpora**, which allow you to create personalized collections of texts related to a particular area of interest.
